CERAMICS**

YOUR  
TECHNICAL  
CERAMICS  
PARTNER

SEDAL CERAMICS is the Technical Ceramics Division of SEDAL GROUP, a leading European sanitary valve company. We are committed to lead the design and manufacturing of technical ceramic components with the highest degree of quality, flexibility and cost effectiveness.

SEDAL CERAMICS started producing key components for mixing cartridges and headworks for the sanitary market. Today we serve customers from many other industries and applications, such automotive, filtering, water seals or chemical seals, leveraging the knowledge and experience gathered along our history.

## FULLY INTEGRATED MANUFACTURING

At SEDAL CERAMICS we produce our own Alumina, the SEDALOX™, up from raw materials. This fact enables us to offer OEM grades and application driven mixes, as well as to have a deep control of the quality from the beginning of the process through the final 100% visual inspection.

## CAPABILITIES

SEDAL CERAMICS has continuously invested in our manufacturing capabilities to be able to offer solutions in a challenging and changing business environment, even developing new exclusive technologies, like Nano Shelter Technology.

- OEM parts co-design
- High precision mold manufacturing
- Raw material formulation
- Dry press and injection processes
- High capacity gas and electric kilns
- Rapid ceramic prototyping
- Machining, lapping and polishing
- 100% parts final inspection
