# DRY FAUCET CARTRIDGES

Dry faucet range is an optimal solution for lead-free policy products, as there is no contact between the water and the metal of the body. It helps to save costs because faucets bodies and spouts can be manufactured with different materials while allowing brass weight reduction in the faucet body.

# SN-35 SISO

# SN-35 BISO

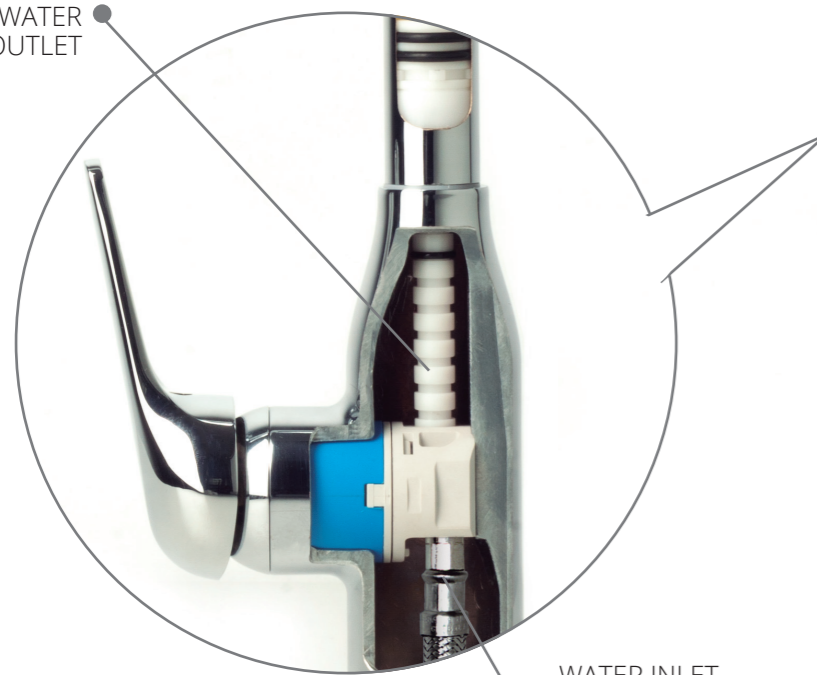

## ADVANTAGES

Optimal solution for lead-free policy products.  
 No contact between water and metal.  
 Specially designed for kitchen applications.  
 Different configurations as it is part of Endura family, such as Standard, Cold or Ecoflow options.

GUIDED WATER OUTLET

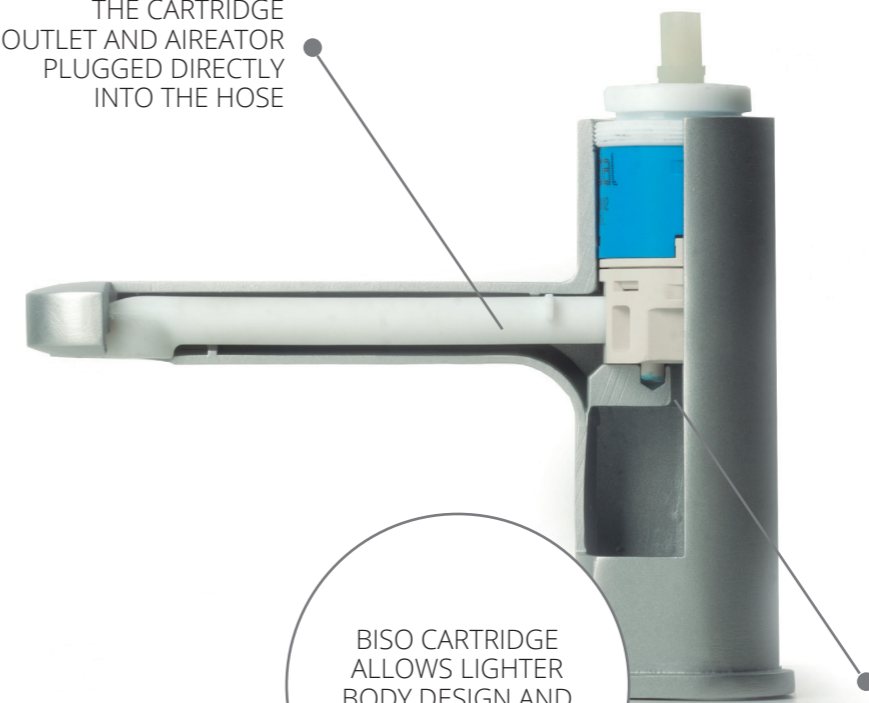

WATER INLET HOSES PLUGGED DIRECTLY INTO THE CARTRIDGE

## ADVANTAGES
